

This profile result from the questionnaire « Profile RADHAR ». It has been conceived to understand the dominant traits of a candidate.

By QUADRANT
Valeur faible <60
Valeur forte =>70

How to read the diagram : The profile analysed is represented by a transparent and blue bordered four-branched star. The length of each branch of the star is proportional to the value of the corresponding quadrant. The branch of the star lying on the red corner indicates a trend of dominant traits.

By PROCESS &
POLES
Valeur forte =>140

Profile characteristics :

"LOGISTICS" and "LOGIC" double dominant profile, type "Manager" and "Implementer".

Such people are consistent in their choices, both from a pragmatic and theoretical point of view. This generates a sound and well-structured personality that combines conceptualisation and action, concrete items and well defined situations with prudent and organised approach..

* The advantage of a dual cerebral ascendancy in the left brain is in the complementarities and mutual reinforcement of the following major dominant traits : analysis and implementation ; critical thinking and pragmatism. One inconvenient aspect of this type of profile is that it can result in communication problems with persons having hearty attitudes, open-mindedness and innovation skills.

One can notice a clear domination of the step by step processing left brain as opposed to the interactive processing right brain: 157 against 121.

Sound balance between the evaluation pole and the perception pole of the brain. The small difference between the two indicates a satisfactory ratio between the concrete mode (limbic) and the intellectual mode (cortical) : 146 against 132.

Activated mental functions

LOGIC	HIGH : assertiveness, reasoning, OTHERS : analysis, competition, critical thinking, technical orientation, expertise.
INTUITION	innovation, vision, risk making, intuition, multi-tasking.
LOGISTIC	HIGH : uncertainty avoidance, OTHERS : Control, (meticulousness, reliability, conservative spirit, perseverance, implementation.
EMOTION	empathy, communication, sociability, emotion, perspicacity, Idealism.
